

# Investment Policy Implementation Document for the Hermes Group Pension Scheme

This document was adopted by the Trustee on May 2023.

## 1. Introduction

This Investment Policy Implementation Document (“IPID”) for the Hermes Group Pension Scheme (the “Scheme”) sets out details of the Scheme’s investment arrangements, based on the principles set out in its Statement of Investment Principles (“SIP”) dated May 2023.

The IPID should be read in conjunction with the SIP. The IPID has been prepared by Hermes Pension Trustees Limited (the “Trustee”), and the Trustee is responsible for ensuring it reflects the current investment arrangements.

## 2. Investment strategy

The Scheme’s investment strategy, as described in the SIP, along with the investment managers appointed to implement the strategy are set out below.

| Asset Class                               | Strategic Allocation | Manager                                                                                                                   |
|-------------------------------------------|----------------------|---------------------------------------------------------------------------------------------------------------------------|
| Global Low Carbon Equity (index matching) | 10%                  | Legal & General Investment Management (“LGIM”)                                                                            |
| Property                                  | 7.5%                 | Aberdeen Standard Investments (“Abrdn”)                                                                                   |
| Diversified Credit <sup>1</sup>           | 15%                  | Aegon Asset Management (“Aegon”)<br>Barings Investment Funds PLC (“Barings”)<br>M&G Investment Management Limited (“M&G”) |
| Buy & Maintain Corporate Bonds            | 22.5%                | Legal & General Investment Management (“LGIM”)                                                                            |
| Liability hedging (including Cash)        | 45%                  | Legal & General Investment Management (“LGIM”)                                                                            |
| <b>Total</b>                              | <b>100%</b>          |                                                                                                                           |

Details of the investment managers, their objectives and investment guidelines are set out in the following sections.

## 3. Global Low Carbon Equity (Index Matching) – 10% of Total Assets

The Scheme invests in a global equity portfolio managed by Legal & General Investment Management (“LGIM”). The portfolio is implemented via two pooled fund investments.

<sup>1</sup> The Diversified Credit allocation incorporates investments in Private Credit and Asset Backed Securities.

LGIM manages the equity portfolio in line with the table below. As shown in the table, the Trustee uses both currency hedged and unhedged funds in order to hedge 75% of developed market currency exposure.

| Allocation (%) | Fund                                                        | Objective                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|----------------|-------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 25%            | Low Carbon Transition Global Equity Index Fund              | To produce a return consistent with the Solactive L&G Low Carbon Transition Global Index. The index aims to provide exposure to developed and emerging equity markets while reducing carbon intensity by 70% at the outset on a de-carbonisation path to achieve net zero by 2050, whilst also significantly reducing the level of carbon reserves and improving green revenues through exposure to six underlying alternatively weighted indices.              |
| 75%            | Low Carbon Transition Global Equity Index Fund – GBP Hedged | To produce a return consistent with the Solactive L&G Low Carbon Transition Global Index – GBP Hedged. The index aims to provide exposure to developed and emerging equity markets while reducing carbon intensity by 70% at the outset on a de-carbonisation path to achieve net zero by 2050, whilst also significantly reducing the level of carbon reserves and improving green revenues through exposure to six underlying alternatively weighted indices. |

#### 4. Property – 7.5% of Total Assets

The Scheme invests in long lease property through a pooled fund with Aberdeen Standard Investments (“Abrdn”). The Scheme is invested in the income distributing share class to provide cashflow for the Scheme.

| Fund                                   | Objective                                                               |
|----------------------------------------|-------------------------------------------------------------------------|
| Standard Life Long Lease Property Fund | To outperform the return of All Stocks Gilts +2% pa over the long term. |

#### 5. Diversified Credit – 15% of Total Assets

The Trustee has made two Private Credit commitments; one to M&G for £9.5m and one to Barings for £11.0m. The M&G Illiquid Credit Opportunities Fund (“ICOF”) has reached the end of its investment period and is gradually returning capital to the Scheme. The Barings European Private Loan Fund II is approaching the end of its investment period which falls in mid-2022.

As the allocation to Private Credit will fluctuate over time, the Trustee also invests in Asset Backed Securities (“ABS”) with Aegon Asset Management (“Aegon”) to provide the balance of the Scheme’s allocation to higher returning credit (referred to in aggregate as Diversified Credit). Any monies committed to Private Credit, but not yet drawn, will be invested in ABS as a high quality, low-risk and liquid holding arrangement.

As the Private Credit investments mature and distribute cash over time, this cash will be invested in ABS and/or Buy & Maintain corporate bonds (investing more capital in Buy & Maintain corporate bonds is necessary to maintain the allocation as these funds also mature and distribute cash over time). This process is expected to de-risk the Scheme over time. As a result of this fluidity, there is no formal allocation split between the funds.

| Fund                                   | Objective                                                                                        |
|----------------------------------------|--------------------------------------------------------------------------------------------------|
| Aegon European ABS Fund                | Informal objective is to outperform SONIA plus 2% pa (net of fees)                               |
| Barings European Private Loan Fund II  | To produce an IRR of 6.5% - 7.5% pa                                                              |
| M&G Illiquid Credit Opportunities Fund | The investment objective of the Fund is to achieve a total return of SONIA + 5% pa, net of fees. |

## 6. Buy & Maintain Corporate Bonds – 22.5% of Total Assets

The Trustee invests in Buy & Maintain Corporate Bonds with LGIM. This allocation is implemented via two pooled funds which amortise over time, providing cashflow for the Scheme. The cashflows from this mandate are incorporated into the Scheme’s liability hedging.

As noted above, as the Scheme’s private credit investments, and the existing Buy & Maintain funds, start to mature the Trustee intends to use surplus cash flow to extend the Buy & Maintain Corporate Bond allocation into longer dated funds in order to increase the extent to which benefit cash flows are matched by this investment. This is also necessary to maintain the strategic allocation to this asset class as the funds mature and distribute cash.

## 7. Liability hedging (including Cash) – 45% of Total Assets

The Scheme’s liability hedging mandate is implemented via a bespoke pooled fund where the Scheme is the sole investor. The fund uses leverage. The liability hedging mandate is passive in nature, but LGIM do operate efficient hedge management. LGIM focus on matching the liabilities as a primary goal, but as a secondary goal, aim to keep the hedge as efficient as possible (by conducting duration and curve neutral trading when opportunities arise to enhance yield – for example, swapping an existing gilt for a newly issued one with a higher yield). The Trustee (with LGIM) has designed the hedge to target 95% interest rate hedging and 90% inflation hedging (as measured on a gilts flat liability basis), taking into account the hedging characteristics of the Scheme’s other assets.
